ABOUT COMPANY

Sunslide Lubricants is a leading Indian manufacturer of automobile and industrial lubricants with over 25 years of expertise. Backed by a strong foundation in technology, research, and analysis, we deliver premium products designed to optimize performance, efficiency, and protection.

Dedicated to innovation and sustainability, we ensure our lubricants enhance machinery longevity, support smooth operations, and reduce wear and tear. Known for superior protection, reliability, and value, we uphold the highest standards in manufacturing and service, even in the most demanding environments.

Guided by our 2024 mission statement, Sunslide Lubricants thrives on three core pillars: Excellence, Trust, and Quality, continually setting benchmarks in lubrication technology and sustainability.

Our Core Pillars Of Success

Core Pillar	Description
Excellence	Consistently delivering high-quality lubricants that exceed industry standards and customer expectations.
Trust	Providing transparent, dependable service alongside reliable, premium-quality products.
Quality	Enhancing machinery performance and reliability through superior lubrication solutions.

Vision:

To be the global leader in lubrication technology, known for innovation, customer satisfaction, and environmental stewardship, while driving industry standards and supporting a sustainable future.

Mission:

To provide high-quality, innovative lubrication solutions that enhance performance and reliability at reasonable prices, with a commitment to technology, customer excellence, and sustainability.

Metal Working Fluids (Swift Cut)

WATER SOLUBLE CUTTING OIL

It is developed by Sunglides own Emulsion technology which forms a strong emulsion with the help of a special surfactant having triple bond structure. Its heat resisting quality prevents thermal degradation by forming a strong adhesion layer on the tool and component even at a high temperature

Features and Benefits	Details
Excellent Performance	- Improved cutting quality - Extended tool life - Bacteria-resistant - Excellent in defoaming - Metal And Non-Metal Compatibility
Operator and Environment Friendly	- Safe for operators and eco-friendly design
Cost Reduction	- Minimum carry-over loss - Extended sump life - Reduction in oil top-up

NEAT CUTTING OIL

Neat Cutting Oil	Details
Description	Inactive type of neat cutting oils formulated with highly refined base oil and appropriately chosen additives
Features and Benefits - Extended Oil Life	Long-lasting formulation reduces frequency of oil replacement
- Excellent Cutting Performance	Ensures smooth operations with precise, high-quality finishes

Rust Preventive Oil (SHIELD)

Our Rust Preventive Oil is a result of intensive research and collaboration with industry experts. This oil provides unmatched corrosion prevention, protecting metal surfaces of machinery, tools, and components with ease of application and removal.

- Excellent rust prevention despite low viscosity
- Excellent anti staining properties
- Excellent Dewatering property
- Ease of de-greasing
- Odourless
- Low Oil Consumption

Hydraulic Oil

(HYDRO FLOW-HLP) (HYDRO SHIELD-AW)

Our Hydraulic Oil range is tailored for both standard and niche applications, formulated with ultra-clean mineral or synthetic base stocks and synergistic additives for optimal performance.

- Excellent Oxidation Stability
- Excellent Thermal Stability
- Excellent Anti-wear properties
- High Viscosity Index
- Non-Corrosive to rubber material
- Less Energy Consumption
- Reduced Maintenance Cost
- Extended equipment life
- Prevents Oil Leakage
- Extraordinary oil life

GEAR OIL

(PRO GEAR / SYNTH GEAR)

Mineral and Synthetic Gear Oils from Sunslide Lubricants are engineered for exceptional protection and performance in industrial and automotive gear systems. They deliver superior lubrication, reduce friction, minimize wear, and ensure smooth operation under heavy loads and extreme conditions, meeting industry standards for reliability and efficiency.

Available Grades

PRO GEAR: 90, 140, 150, 220, 320, 460, 680
SYNTH GEAR: 150, 220, 320, 460, 680

SLIDEWAY OIL

(PRO LUBE)

High-performance lubricant specifically designed for slideways, providing superior protection and performance in machining environments. It offers excellent friction-reducing properties, minimizing wear and improving the smooth operation of slideway systems. Formulated with high-quality base oils and advanced additives, Sunslide Slideway Oil ensures outstanding anti-wear, anti-corrosion, and anti-foaming properties

Available Grades

PRO LUBE:68/100/220

SPINDEL OIL

(ELITE SPINDLE) (SPIN FLOW AO)

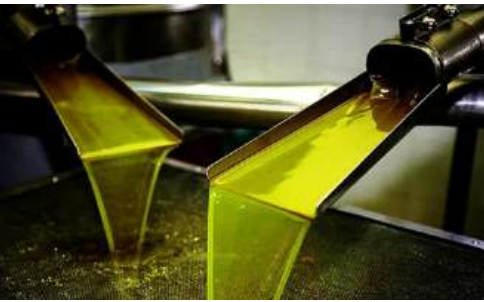

Sunslide Spindle Oil delivers optimal performance for high-speed spindles and precision machinery with exceptional lubrication, oxidation stability, and rust protection, ensuring smooth operation and extended component life.

Available Grades

SPIN FLOW AO:10/12ELITE
SPINDE:10/12/22

QUENCHING OIL

(FROST QUENCH)

Quenching Oil is specially designed for heat treatment processes, providing rapid and uniform cooling to prevent material warping or cracking. Formulated with premium base oils and advanced additives, it offers excellent oxidation resistance to prevent sludge formation, along with anti-wear and anti-corrosion properties to enhance equipment durability and maintain oil stability under high temperatures.

HONING OIL

(Prime Hone)

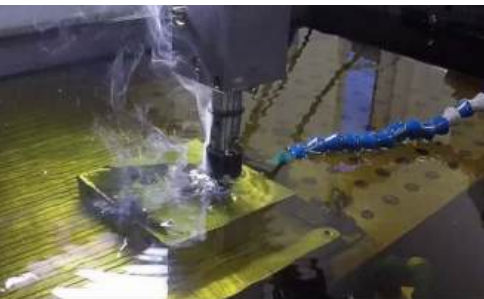

Honing Oil is designed to optimize the honing process, offering superior lubrication and cooling to reduce friction and prevent metal build-up on abrasive surfaces. This ensures efficient operation, improved tool life, and high-quality surface finishes. With advanced anti-wear, anti-foam, and rust prevention properties, it delivers long-lasting performance and effective corrosion protection.

Available Grades

Prime Hone:5/7

EDM OIL

(EDM ELITE)

Specifically designed for Electrical Discharge Machining (EDM) applications. It offers exceptional cooling and flushing properties, efficiently removing debris and maintaining optimal machining conditions during the EDM process. Formulated with premium base oils and specialized additives, provides superior dielectric strength, ensuring stable and consistent performance during spark erosion. It also offers excellent lubrication and anti-wear protection, reducing friction and extending the life of both the workpiece and electrode.

HEAT TREATMENT FLUID

(THERM PRO)

Designed for efficient thermal management in industrial applications. Formulated with high-quality base oils and advanced additives, it provides excellent heat transfer properties, ensuring consistent temperature control in a wide range of systems, including heat exchangers, ovens, furnaces, and cooling systems. Superior thermal stability, preventing breakdown at high temperatures, and provides excellent oxidation resistance to extend the life of the fluid and the equipment. It also protects against corrosion and scale formation, ensuring reliable performance and improved system efficiency. Ideal for use in both high- and low-temperature applications.

MACHINE OIL

(Radix)

Designed to provide superior protection and performance for a wide range of industrial machinery. Formulated with high-quality base oils and advanced additives, it offers excellent anti-wear, anti-corrosion, and oxidation resistance properties, ensuring smooth and efficient operation of machinery under varying loads and temperatures. Reduces friction, minimizes wear, and helps extend the lifespan of critical components such as bearings, gears, and other moving parts. Ideal for use in both general-purpose and heavy-duty applications, it ensures reliable performance, reduces maintenance costs, and enhances the overall efficiency.

ROLLING OIL

(ROLL GUARD)

Lubricant specifically formulated for the metalworking industry, particularly for use in rolling mills. It provides excellent lubrication and cooling properties, ensuring smooth operation during the rolling process. Effectively reduces friction between the rollers and the metal workpieces, preventing wear and tear on equipment and enhancing surface quality. The oil is designed to offer superior oxidation resistance, corrosion protection, and excellent stability.

COMPRESSOR OIL

(Prime Compress) (RCP Compress)

Specifically designed to ensure optimal performance and longevity of air compressors and other compression equipment. Formulated with premium base oils and advanced additives, it provides excellent lubrication, reducing friction and wear on critical components such as pistons, bearings, and valves. Offers superior oxidation and thermal stability, preventing sludge and varnish formation even under high temperatures and heavy loads. It also provides excellent rust and corrosion protection, extending the life of the compressor.

TURBINE OIL

(Turbo Shield) (Turbo Shield EP)

High-performance lubricant specifically designed to meet the demanding requirements of steam, gas, and hydroelectric turbine systems. Formulated with premium base oils and advanced additives, it offers excellent oxidation stability, rust and corrosion protection, and superior anti-wear properties, ensuring smooth and reliable turbine operation. Effectively reduces friction, minimizing wear on turbine components while providing excellent heat dissipation and preventing the formation of sludge or deposits. Ideal for both industrial and power generation turbines, this oil helps extend the life of equipment, improve operational efficiency, and reduce maintenance costs.

Greases (STELLAR)

A wide range of commodity and specialty industrial and automotive grease products line giving optimal solutions for wide variety of applications including application in vehicles, construction ,machinery and agricultural equipment . Formulated with highly refined mineral oils and additives applicable for wide range of applications

Stellar MP-3 Grease

A multipurpose Lithium based grease suitable for cases where high temperature and water contamination is encountered and it has excellent resistance to water washout and oxidation.

Stellar AP-3 Grease

Lithium soap base automotive grease of NLGI 3 consistency. It is manufactured from Superior quality base stock and special lithium soap fortified with anti-oxidant and anti-rust additive. This grease has extremely good storage and service stability

Stellar AP-3 Red Gel Grease

Lithium soap base automotive grease of NLGI 3 consistency. It is manufactured from Superior quality base stock and special lithium soap fortified with anti-oxidant and anti-rust additive. This grease has extremely good storage and service stability

Stellar CalciPure Grease

Stellar CalciPure Grease is a premium, high-performance grease designed for exceptional water resistance, corrosion protection, and stability in harsh operating conditions. Formulated with a calcium sulphonate complex thickener, this grease offers superior protection against wear, oxidation, and rust while maintaining excellent performance under extreme pressure and high temperatures. Its unique composition ensures long-lasting lubrication and durability in demanding industrial and automotive applications.

Stellar CalciPure provides outstanding resistance to water washout, making it ideal for applications exposed to moisture, humidity, or harsh environmental conditions. It also exhibits excellent high-load carrying capacity, making it suitable for use in equipment subjected to heavy-duty operations. This grease is designed to enhance the reliability and efficiency of machinery while extending service life and reducing downtime

Stellar Long Life Red

High quality, multipurpose, NLGI 3 grade, lithium grease. It is formulated to provide added protection against rusting and water washout in general purpose automotive applications at moderate temperatures and loads

Stellar EP

STELLAR EP 1 & EP 2: Versatile, high-performance greases suitable for high-pressure greasing equipment and automatic lubrication systems. EP 2 is particularly effective for general industrial and automotive applications, enabling product consolidation across multiple uses.

STELLAR EP 0: Delivers excellent pumpability through small bore systems, maintaining steady flow even in remote lubrication points. Ideal for modern automatic lubrication setups.

STELLAR EP 00: A semi-fluid grease recommended for automatic greasing units. Also serves as an alternative to industrial gear oils, effectively minimizing leakage in critical applications.

STELLAR EP 000: Semi-fluid grease specialized for commercial vehicles and machinery using automatic lubrication systems. Suitable for enclosed gearboxes with high leakage rates, offering enhanced reliability and performance.

Stellar Pyro

Sunglide Stellar Pyro 220 High-Temperature Grease is a high-performance lubricant designed for extreme heat and pressure environments. It withstands temperatures up to 1400°C, offering excellent thermal stability, wear protection, and corrosion resistance. Ideal for heavy-duty industrial applications, it reduces friction, extends component life, and minimizes downtime.

Stellar Chasis

Chassis Grease is a premium-grade lubricant specifically designed for effective and reliable performance in automotive and industrial applications. This high-quality grease is meticulously formulated using a blend of highly refined petroleum oils, calcium soap, and advanced performance-enhancing additives. The result is a smooth, homogeneous product that ensures superior lubrication, long-lasting protection, and seamless operation under a variety of demanding conditions

Stellar SL

Stellar SL is non soap base smooth structure greases having excellent ability to withstand high temperature and severe shock load conditions.

Stellar SLXX

Sunglide Stellar SLXX are nonsoap base smooth structure greases having excellent ability to withstand high temperature and severe shock load conditions. Sunglide Stellar SLXX has high load bearing ability.

AUTOMOTIVE

Premium Range Of Automotive Lubricants including engine and gear oils for four wheelers, two/three wheelers and off highway earthmoving and industrial equipment besides a vast range of functional specialties for diverse automotive applications.

Engine Oils

(MAX DRIVE)

High-performance motor oil designed to provide superior engine protection and enhanced performance. Formulated with advanced additives, it offers excellent wear resistance, improved fuel efficiency, and enhanced lubrication in extreme conditions. Ideal for both gasoline and diesel engines, it helps extend engine life, reduce friction, and ensure smooth operation under high-stress driving. Perfect for high-performance vehicles and heavy-duty applications

Coolants

(Coolguard)

Sunslide Coolant is a premium antifreeze solution designed to provide optimal engine cooling and protection. It effectively regulates engine temperature, preventing overheating and freezing in extreme weather conditions. Formulated with advanced additives, it helps prevent corrosion, scale buildup, and rust, extending the lifespan of the radiator and cooling system. Suitable for a wide range of vehicles, Sunslide Coolant ensures reliable performance and efficient heat transfer for both gasoline and diesel engines

Brake Oils

(Brake Guard)

Sunslide BrakeGuard is a high-quality brake fluid designed to deliver exceptional braking performance and safety. It provides excellent heat resistance, preventing brake fade under extreme conditions, and ensures smooth and responsive braking. Formulated with advanced additives, BrakeGuard offers superior corrosion protection for brake system components and maintains consistent performance over time. Ideal for both standard and high-performance vehicles, it helps optimize brake efficiency and extends the lifespan of the braking system
